

FLEXIBLE
PACKAGING

Our products from environmentally-friendly materials Packaging with added value - quality in harmony with nature

Founded in 1896 as a family business and now led by the fourth generation, sustainability is one of the cornerstones of VP's long-term business strategy. From this perspective, we decided voluntarily to set up our corporate group to be 100% climate-neutral back in 2012.

We are continuing this commitment with our eco line products and can present a multitude of sustainable product innovations for you with this brochure. We have been able to maintain the known high quality of our products whilst using resource-conserving raw materials. See for yourself on the next pages!

Document pouches and security bags made from recycled film

New to the range: docuFIX® classic eco and docuCARE® eco

docuFIX® classic eco

Our self-adhesive document envelopes have been a byword in the market for the reliable sending of accompanying paperwork. We are now able to offer these pockets as eco variants with a film made from >80% post-consumer recycled material and FSC®-certified paper. This enables household plastic waste to be fed back into the recycling loop instead of using new resources.

NEW - Available from stock

Designation	External dimensions in mm	Article number
C6 delivery note / invoice multilingual	175x115+20	2FVDO335211PCR
LD delivery note / invoice multilingual	240x115+20	2FVDO335212PCR
C5 delivery note / invoice multilingual	240x165+20	2FVDO335213PCR
C6 neutral	175x115+20	2FVDO335111PCR
LD neutral	240x115+20	2FVDO335112PCR
C5 neutral	240x165+20	2FVDO335113PCR

docuCARE® classic eco

The sharp rise in e-commerce activities in the last few years has significantly increased the demand for polythene envelopes. We take our responsibilities seriously and so have dedicated ourselves to a sustainable approach to packaging materials. For this reason, our docuCARE® classic light range will be produced with 70% recycled content as standard from now on. You can also order our docuCARE® classic products with >70% recycled film if you wish.

docuCARE® plus eco

Our docuCARE® plus security bags have proven themselves a million times when sending money or valuables. Now we have been able to develop a film made with >80% post-consumer recycled material for our transparent pouches. This is another important step towards the sustainable utilisation of the recycling loop.

You can find further information about our stock items and product variants on our website.

Mailing bags made from FSC® paper or grass paper

New to the range: flexiPAK classic eco and aroFOL® classic eco

flexiPAK classic now made from FSC® paper

We have changed over our whole stock range to FSC®-certified paper and paper from other controlled sources. In addition, you can now order mailing bags made from white FSC®-certified paper as well as an additional standard format. If desired, we can also produce our environmentally-friendly block bottom bags from 100% recycled paper.

NEW - Available from stock

Designation	External dimensions in mm	Article number
White / FSC®	260x70x410+50	2FVMF001120
White / FSC®	300x80x430+50	2FVMF001151
White / FSC®	360x100x560+50	2FVMF001160
Brown / FSC®	360x100x560+50	2FVMF001161

aroFOL® classic made from FSC®-paper

Our air bubble bags have proven themselves billions of times and have been produced climate-neutrally as standard for years now. In doing so, we only use FSC®-certified paper and paper from other controlled sources. We also use recycled material for the production of our air bubble film. Our 13 standard sizes can be delivered from stock in white and brown.

You can find further information about our stock items and product variants on our website.

flexiPAK classic eco and aroFOL® classic eco made from grass paper

Made from grass paper

An innovative idea is currently sweeping through the paper industry: Paper from a quick-growing raw material - grass! Discover our aroFOL® and flexiPAK mailing pouches, now also made from grass paper - a particularly resource-conserving and environmentally friendly material with unique colouring, haptics and smell. Of course, there is also a great variety of printing and product options available with this variant.

7/G Grass paper	250x350+50	2FVAF000807

Climate protection - Our actions

One of our most important steps towards a climate-neutral company was the development of a holistic climate-protection strategy. For this, we had the CO₂ footprint for the whole company measured early on and we were able to continuously reduce it throughout the years. This was achieved through numerous measures such as the replacement of the heating systems and the installation of a cogeneration power unit. As early as the 1990s, we had implemented a gradual changeover to water-based printing inks.

Our environmental partners and memberships:

- Klimaschutz-Unternehmen e.V.
(Association of climate-protection companies)
- ClimatePartner
- Umweltpakt Bayern (Bavarian environmental pact)
- Bundesdeutscher Arbeitskreis für Umweltbewusstes Management e.V.
(B.A.U.M.) (German Environmental Management Association)

Ecological production

Amongst other things, VP relies on raw materials from sustainable forestry, fast-growing grass fibres and materials with recycled content. With the purchase of an FSC®-certified product, you are supporting the responsible use of the world's forests. We process resource-conserving recycled films and print with water-based inks in order to minimise the environmental burden. In addition, the use of solvents in adhesives is being continuously reduced. We also support climate protection projects in Kenya and Papua New Guinea, which are certified in accordance with the internationally recognised Verified Carbon Standard and take social aspects into account. As a result, the remaining greenhouse gas emissions from VP are completely balanced out.

Climate-neutral product

We offer you the option of ordering 100% CO₂-neutral products for a small extra charge. Of course, we can verify and document the climate-neutrality of all products through our collaboration with ClimatePartner. Additionally compensated are:

- the raw material itself and its disposal
- the transport of the raw materials to VP
- the transport from you to your customers

Contact us:

Let us impress you with our competence, our service and our sustainable packaging! We look forward to your enquiry.
